Brian:

We do not have any problems with allowing TCEQ time to review the plans. Hopefully, they will not take much time with the review since they have already reviewed the draft plans. Let me know if you see the review will take more than the week they have requested.

The QAPP and FSP have signature pages for approval. Please sign and date each page, and send me a copy (scan via email or copy via mail). Your signature on the pages denotes your approval of the plans. We will proceed to the next phase of the project once we receive your approval of the plans.

Thank you,

Bob

I have been asked by TCEQ if I can wait until they look over the documents before sending an email approving them. They have requested that I wait until next week if possible. Please let me know if this request will cause you any problems and if not I will send something out to you next week. Also do you want it as a letter or is an email sufficient ?

thanks
